

Floor Frame & Foundation Kits

Optional Foundation Kits

These are self squaring heavy duty hot-dipped galvanized steel frame kits. They provide a perfect base for our sheds.

Protects from ground moisture

- Helps in leveling building site
- Helps speed building assembly
- Lay down your choice of plywood, gravel or other flooring material (not supplied)
- Use it as a form for a concrete slab

The foundation kits are designed to "float" inside the walls of the shed kits. The sheds DO NOT sit on top of the foundation kits and need to be anchored to a surface independent of the foundation kit.
