

## The Polaria Screened Patio Enclosure...

- These specialty screened patio enclosures have a **Roof Structure** that is 2 1/2" x 1 5/8" rafters extending 10' to 14' from the house wall. In addition there is a 3 1/2" x 5" support beam running the full width of the unit (10' to 18') supporting the rafters at the midway mark. The complete roof structure is made of extruded aluminum with a baked on enamel finish. Once up, there is no need to take it down!
- This sunroom kit has a **Super Vent** built into each gable end, allowing for the escape of wind and humidity.
- The Polaria screened patio enclosures have a cover that will last up to 15 years in normal conditions. This **22 Ounce Vinyl** is made to last. Need more? Okay, finally there is a special cold crack resistant additive to the vinyl so that the top can withstand temperatures as low as -50°F. Of course it is guaranteed for 5 years against discoloration.
- Designed to stay up all year round the Polaria is built on an extruded aluminum frame with a cross beam on the roof for added strength.
- The aluminum is coated with baked-on enamel paint (white or beige) that will neither rust nor peel.
- The 22-ounce vinyl canvas has a lifespan of 15 to 18 years and remains installed year round. It is also flame retardant (NFPA 701), UV resistant to prevent yellowing, tear and abrasive resistant and we have incorporated an "anti-wicking" agent to prevent mold and mildew. Its vinyl panels are heat-sealed together to make the canvas that much more efficient.
- The Flash System, our patented non-lacing fastening system, allows for the optimal canvas tension to the frame.
- The polymer windows can be easily removed to facilitate maintenance. We recommend cleaning them with a mild, non-abrasive soap diluted in a large quantity of water.
- These sunroom kits also have a **6" Overhang** built into every unit, preventing the rain from washing down the screen face. Also as part of the overhang is our aesthetically pleasing **Double Valence**, where the second valence is white and is part of our special roof attach system. Our valences can be the wave format or straight - your choice.
- Used as spa enclosure kits, these patio enclosures are made with **1/8" thick Extruded Aluminum!** Made to last!
- Panel sizes are 56.5" wide and 78" high. The entry door is a 35" wide "in-swinging" door. The 56.5" panel holding the door also has a sidelite on either side of the door - each measuring 10" wide.
- Our Polaria screened patio enclosures come with **Sliding Polymer Windows**. Fully framed, the polymer is made especially for us with a Japanese calendaring process. It is made with a super double clear polish in either clear or smoke and has a 20 ml thickness - virtually unbreakable! Of course, in keeping with the quality of the rest of this spa gazebo kit, the polymer windows are UV resistant, crack resistant up to -30°F, fire retardant and has the anti-wicking agent to prevent mold and mildew. The windows slide sideways and are designed to be left in place, for the winter.

Projection Consists of...	Panel Sizes for each Unit - (78" high)				A	B	C
	Panel #1	Panel #2	Panel #3	Panel #4	Footprint	Roof Dimensions	Back-wall Height
10 feet	56 1/2"	56 1/2"			117 1/4"	120 3/4"	94 7/8"
11 feet	56 1/2"	56 1/2"	10 3/4"		128"	131 1/2"	96 1/4"
12 feet	56 1/2"	56 1/2"	25"		142 1/4"	145 3/4"	98"
13 feet	56 1/2"	56 1/2"	25"	10 3/4"	153"	156 1/2"	99 3/8"
14 feet	56 1/2"	56 1/2"	25"	25"	167 1/4"	170 3/4"	101 1/8"

**\*NOTE:** There is a standard back wall height for each of the 5 projections listed above. Be sure to know what back-wall height minimum you need to have for the size of unit you desire. You **cannot** get a lower back wall height than what is listed, however a higher back-wall height is possible at a premium cost.

Width Consists of...	Panel Sizes for each Unit - (78" high)					A	B
	Panel #1	Panel #2	Panel #3	Panel #4	Panel #5	Footprint	Roof Dimensions
